RFgen Software – Goodrich Landing Gear Selects **RFgen** for JD Edwards Data Collection

EL DORADO HILLS, CA – November 8, 2006 – The DataMAX Software Group, Inc., a leader in Automated Data Collection Software with over 2,000 installations worldwide, has announced **Goodrich Landing Gear selected RFgen JD Edwards Integration Suite** for their data collection requirements. Headquartered in Charlotte NC, and part of the Goodrich Group, the Landing Gear Division supports commercial, military, regional and business customers throughout the world. Their customers include; Boeing Commercial and Military, Lockheed-Martin, Airbus, Bombardier, Gulfstream, Agusta, Sikorsky and the United States government.

Goodrich was seeking a Data Collection solution for their New South Wales, Australia facility that could be easily and seamlessly integrated to their existing **JD Edwards EnterpriseOne ERP** system. The **RFgen JD Edwards Open Source Transactions** especially intrigued them. They were able to take advantage of our “Out of the Box” solutions. The fact that RFgen does not require any code changes to the ERP system was also important to Goodrich. This unique approach was desirable for Goodrich who sought to increase productivity and accuracy while obtaining a **lower Total Cost of Ownership** when compared to other solutions available for JD Edwards data collection. With their in-house JDE expertise and VBA programming skills, they were able to approach the implementation process with minimal assistance from RFgen- the result is an extremely low implementation cost, and greater understanding and control of the final solution.

About the DataMAX Software Group, Inc.

In business since 1983, software from the DataMAX Group has a proven track record of success when it comes to designing, implementing and deploying wireless and mobile solutions. RFgen enabled solutions can be found in over half of all Fortune 100 manufacturing companies as well as in numerous mid-level and smaller enterprises. DataMAX's flagship product, the RFgen Framework, is a system for delivering wireless and mobile automated data capture solutions. Whether the target is distribution, manufacturing, retail, agriculture, pharmaceuticals, healthcare, or something else, RFgen is flexible enough to meet your unique requirements. A Certified Oracle, SAP and Microsoft Partner, DataMAX is a leading provider of Automated Data Collection Software Solutions, Transaction Suites, and Services to major corporations in the United States, Europe, and Asia. RFgen Software is installed and supported worldwide by 125+ associated resellers and partners.
