RFgen Software – RSI Home Products Selects **RFgen** for JD Edwards Data Collection

EL DORADO HILLS, CA – January 1, 2007 – The DataMAX Software Group, Inc., a leader in Automated Data Collection Software with over 2,000 installations worldwide, has announced **RSI Home Products selected RFgen JD Edwards Integration Suite** for their data collection requirements. Headquartered in Newport Beach CA, RSI Home Products is a leading manufacturer of fine home cabinetry, counter tops and bathroom fixtures. RSI has experienced explosive growth, and achieved dominant market share with its product lines. RSI has not only continued to take market share every year since 1989, but has also helped to grow the actual size of the market by creating product values that never before existed. Their expectation is to achieve leading share in any market in which they serve by providing products and services that reflect tangible value far greater than that of their competitors.

RSI Home Products was seeking a Data Collection solution that could be easily and seamlessly integrated to their existing **JD Edwards EnterpriseOne ERP** system. The **RFgen JD Edwards Open Source Transactions** especially intrigued them. They were able to take advantage of our “Out of the Box” solutions for: WO Completion, PO Receipt, Pick to License Plate and Ship License Plate. The fact that RFgen does not require any code changes to the ERP system was also important to RSI. This unique approach was desirable for RSI who sought to increase productivity and accuracy while obtaining a **lower Total Cost of Ownership** when compared to other solutions available for JD Edwards data collection.

About the DataMAX Software Group, Inc.

In business since 1983, software from the DataMAX Group has a proven track record of success when it comes to designing, implementing and deploying wireless and mobile solutions. RFgen enabled solutions can be found in over half of all Fortune 100 manufacturing companies as well as in numerous mid-level and smaller enterprises. DataMAX's flagship product, the RFgen Framework, is a system for delivering wireless and mobile automated data capture solutions. Whether the target is distribution, manufacturing, retail, agriculture, pharmaceuticals, healthcare, or something else, RFgen is flexible enough to meet your unique requirements. A Certified Oracle, SAP and Microsoft Partner, DataMAX is a leading provider of Automated Data Collection Software Solutions, Transaction Suites, and Services to major corporations in the United States, Europe, and Asia. RFgen Software is installed and supported worldwide by 125+ associated resellers and partners.
