

## PRESS RELEASE

### FOR IMMEDIATE RELEASE

#### RFgen Software – Clallam County, WA PUD Selects **RFgen** for JD Edwards Data Collection

**EL DORADO HILLS, CA – February 5, 2007** – The DataMAX Software Group, Inc., a leader in Automated Data Collection Software with over 2,000 installations worldwide, has announced **Clallam County, WA PUD selected RFgen JD Edwards Integration Suite** for their data collection requirements. Headquartered in Port Angeles WA, Clallam Public Utility District #1 provides; electric, water and broadband Internet utilities to the residents of Sekiu, Forks, Sequim and Port Angeles. The utility district was formed in 1940 and has continued to provide reliable, safe, efficient and low-cost utility services for the county's growing population.

Clallam County PUD was seeking a Data Collection solution that could be easily and seamlessly integrated to their existing **JD Edwards World ERP** system. The **RFgen JD Edwards Open Source Transactions** especially intrigued them. They were able to take advantage of our "Out of the Box" solutions to meet their inventory tracking needs. The fact that RFgen does not require any code changes to the ERP system was also important to the utility district. This unique approach was desirable for Clallam PUD who sought to increase productivity and accuracy while obtaining a **lower Total Cost of Ownership** when compared to other solutions available for JD Edwards data collection. With their in-house JDE expertise and VBA programming skills, they were able to approach the implementation process with minimal assistance from RFgen- the result is an extremely low implementation cost, and greater understanding and control of the final solution.

#### **About the DataMAX Software Group, Inc.**

In business since 1983, software from the DataMAX Group has a proven track record of success when it comes to designing, implementing and deploying wireless and mobile solutions. RFgen enabled solutions can be found in over half of all Fortune 100 manufacturing companies as well as in numerous mid-level and smaller enterprises. DataMAX's flagship product, the RFgen Framework, is a system for delivering wireless and mobile automated data capture solutions.
