PRESS RELEASE

Jason Brush Group – Selects RFgen Data Collection to Integrate with SAP

EL DORADO HILLS, CA – October 25, 2008 – The DataMAX Software Group, Inc., a leader in Automated Data Collection Software with over 2,000+ installations worldwide, announced Jason Brush's decision to purchase and implement RFgen for their warehouse management solutions. RFgen's SAP Certified Integration Software opened up James Brush SAP warehouse system to a new level that will offer inventory flexibility and accuracy.

RFgen is deploying warehouse management functions to enhance the standard SAP transactions and streamline the warehouse of Jason Brush. Specifically Jason Brush is implementing bin to bin transfers, component withdrawals, order confirmations, and MIGO transactions. A few custom applications were developed such as "bin inquiry by material" providing accurate location identification. The executions of RFgen's SAP "Open Source" transaction suites will extend with ease and flexibility Jason Brush's current SAP system. Once executed and in production, Jason Brush has plans to expand their RFgen systems to improve accuracy, increase productivity and provide accountability in the warehouse environment.

The Jason Brush Group, comprised of Osborn International, Sealeze and Atlanta Brush, is the world's largest manufacturer of industrial brushes. There is virtually no market for finishing products throughout the world in which these businesses do not participate. Key to the growth of the Assembled Products Group has been the ability of Jason's engineers to re-design the customer's product and to substantially reduce costs by integrating the stamping and semi-automatic assembly processes.
