## PRESS RELEASE

Kenworth Truck Company – Purchases RFgen to replace dcLink for managing their stock in Australia

**EL DORADO HILLS, CA – May 27, 2008** – The DataMAX Software Group, Inc., a leader in Automated Data Collection Software with over 2,000+ installations worldwide, announces that Kenworth Truck Company **selected RFgen JD Edwards Integration Suite** for their JD Edwards OneWorld Xe. Replacing their current dcLink RF data collection solution, Kenworth is installing RFgen to manage stock in one of their component warehouses. RFgen Data Collection Solutions were purchased and implemented based on cost savings, speed of operation and ease of use.

Kenworth Truck Company, a division of PACCAR Inc, is a leading manufacturer of heavy and medium duty trucks. Since 1923, Kenworth has an extensive dealer network of more than 290 locations. This dealer network provides the parts, service and body shipment support. Fusion5 Supply Chain department is the Australian DataMAX partner that sealed the deal with Kenworth. The objective is to replace the current data capture solution, dcLink, in their Australian component warehouse and any other warehouses going forward. They are looking to go with RFgen long-term due to a proven lower cost of ownership of the software.

Following the RFgen implementation, Kenworth was more than pleased with the cost savings, speed of operation and ease of use of their new wireless and mobile data collection solution. Currently using RFgen to manage distribution transactions within their Colchester Road parts warehouse, Kenworth plans to incorporate RFgen in other facilities as well. Initially only implementing stock takes with their wireless devices, Kenworth plans to roll out to other distribution transactions over the next few months. There are several standard open source transactions that are not yet within the scope of their project. However, Kenworth was thrilled to receive them as part of the open Source contained within the JD Edwards Integration Suite. With Fusion5 professional services, Kenworth can implement them at any time with no additional costs.
