FOR IMMEDIATE RELEASE

RFgen Software – Johnson & Johnson Selects **RFgen** for SAP Data Collection

EL DORADO HILLS, CA – December 15, 2006 – The DataMAX Software Group, Inc., a leader in Automated Data Collection Software with over 2,000 installations worldwide, has announced **Johnson & Johnson selected RFgen SAP Integration Suite** for their data collection requirements. Headquartered in New Brunswick, New Jersey, Johnson & Johnson, through its operating companies, is the world's most comprehensive and broadly based manufacturer of health care products, as well as a provider of related services, for the consumer, pharmaceutical, and medical devices and diagnostics markets. The more than 200 Johnson & Johnson operating companies employ approximately 122,000 men and women in 57 countries and sell products through out the world.

Johnson & Johnson was seeking a Data Collection solution that could be easily and seamlessly integrated to their existing **SAP ERP** system. The fact that RFgen does not require any code changes to the ERP system was also important to Johnson & Johnson. This unique approach was desirable for Johnson & Johnson who sought to increase productivity and accuracy while obtaining a **lower Total Cost of Ownership** when compared to other solutions available for SAP data collection. With their in-house SAP expertise and VBA programming skills, they were able to approach the implementation process with minimal assistance from RFgen- the result is an extremely low implementation cost, and greater understanding and control of the final solution.

About the DataMAX Software Group, Inc.

Founded in 1995, the DataMAX Software Group, Inc. is a Certified and Validated **Oracle, SAP** and **Microsoft** Partner and is a leading provider of Automated Data Collection Software Solutions, Transaction Suites, and Services to major corporations in the United States, Europe, and Asia.
