

Develop & Deploy ADC Applications UP TO 5X FASTER

than any other application development product!

RFgen Provides the **FLEXIBILITY** to Integrate Future Applications:

- . **RFID Support**
- . **Mobile Applications**
- . **CE Support**

RFgen also provides a smooth **MIGRATION PATH** from all **Legacy Systems!**

The DataMAX Software Group, Inc.,
Presents:

RFgen Release 2.5!

Project Management
Application Development
Training & Consulting

DATAMAX

5090 Robert J Mathews Pkwy., #1
El Dorado Hills, CA 95762

www.rfgen.com

RFgen Software Release 2.5 has been dynamically engineered to allow you to integrate any SQL compatible database, industry standard ERP software, RFID technology, or portable wireless computer, into **one unified data collection system.**

RFgen's primary programming tool is 'Visual Basic' so you can save time, expense and support efforts by finally saying goodbye to 'C'!

No 'C' = Easy!

RFgen is a Win 95/98/NT/2000 Software product and supports data collection equipment from **Intermec, Telxon, Teklogix, Symbol, LXE, Casio, Handheld Products** and many more.

*Build 1,000,001 Applications...
Including the one that's right for YOU!*

RFgen Software
by the DataMAX Software Group Inc.

With RFgen you can...

- **Connect** to any SQL compliant database, such as Access, DB2, SQL Server, Oracle & more.
- **Design** on-line data collection forms with real-time data validation, scrolling lists and printer support.
- **Test** your data collection applications on your PC or on your barcode devices—*before you buy.*
- **Deploy** program updates and revisions instantly without re-flashing units or incurring costly down time.
- **Support** remote locations without leaving your office through dial-up services or Internet/ Intranet access.

The logo for DataMAX, featuring the word "DATAMAX" in a bold, sans-serif font. A red diagonal slash is positioned over the "A" and "M".

Quality

The DataMAX Group's software testing program is among the most rigorous in the industry to ensure 24/7 customer operations. By allying ourselves exclusively with the most prestigious, aggressive and financially sound ADC vendors, we are assured of immediate involvement in the direction of emerging technology and can take advantage of improved cost and product availability as it occurs.

Open Systems

All **RFgen** installations are designed to meet a customer's precise needs and specifications. We support the broadest variety of RF Devices and RF Network technologies from all of the major ADC vendors. **RFgen** also integrates seamlessly with any SQL compliant database.

Scalability

RFgen systems are designed to keep pace with your automated data collection demands. **RFgen** takes full advantage of a new protocol called RPP (Remote Power Projection), which allows us to provide Pentium like performance on handheld devices, regardless of their processor.

Ease of Implementation

RFgen systems are Windows based plug and play solutions, pre-configured and delivered complete with all the necessary hardware and software for smooth, simple integration into your enterprise.

Customer Support

All **RFgen** systems are designed for maximum performance and reliability. We stand firmly behind the products we sell with an iron-clad support system, including full-coverage warranties, comprehensive technical support, custom programming, consulting and training services.

Reliability

The world's leading companies depend on **RFgen** designed systems to deliver uncompromising quality, value and performance. Whether its Inventory Control, Picking, Shipping or Warehouse Management, **RFgen** has achieved a sterling reputation for delivering unmatched performance when nothing less will do.
