

PRESS RELEASE **FOR IMMEDIATE RELEASE**

RFgen Software's Mobile Framework Achieves Oracle Validated Integration with Oracle E-Business Suite 12.2

Integration delivers voice-enabled workflows and roaming mobile applications to empower workforces and drive solid results.

EL DORADO HILLS, CA (January 5, 2015) – [RFgen Software](#) a Gold level member of Oracle PartnerNetwork (OPN), today announced it has achieved Oracle Validated Integration of RFgen Mobile Framework Version 5 with Oracle E-Business Suite 12.2. The RFgen integration with Oracle E-Business Suite supports real-time warehouse and manufacturing voice-directed workflows, as well as roaming, offline mobile capabilities.

To achieve Oracle Validated Integration, Oracle partners are required to meet a stringent set of requirements that are based on the needs and priorities of the customers. RFgen's native support for Vocollect devices allows businesses using Oracle E-Business Suite to voice-enable their existing mobile supply chain application workflows as well as create new ones. Additionally, for scenarios requiring operations in remote locations or areas where wireless coverage is unavailable, RFgen's roaming mobile clients can operate in an offline mode and automatically update Oracle E-Business Suite when a network connection becomes available.

"The RFgen Mobile Framework delivers robust integration with Oracle E-Business Suite workflows without requiring a footprint on your Oracle servers. RFgen's architecture has been designed to support the rapid customization of business processes while delivering ideal developer productivity tools," said Robert Brice, President, RFgen Software.

The RFgen Mobile Framework utilizes Oracle E-Business Suite base tables for validation and respects the existing configuration options contained within the Oracle E-Business Suite environment. Interaction within Oracle E-Business Suite takes place via standard PL/SQL read-only queries and procedures coupled with standard Oracle open interface calls to submit the validated transactions to Oracle E-Business Suite for updating. This design model assures the performance necessary to drive enhanced employee/workflow productivity and provides the confidence that Oracle E-Business Suite tasks will be properly updated.

"Achieving Oracle Validated Integration gives our customers confidence that the integration between RFgen's Mobile Framework Version 5 and Oracle E-Business Suite 12.2 is functionally sound and performs as tested," said Kevin O'Brien, senior director, ISV and SaaS Strategy, Oracle. "For solutions deployed on-premise, in the cloud, or both, Oracle Validated Integration applies a rigorous technical review and test process that helps to reduce deployment risk and improves the user experience of the partner's integrated offering."

About RFgen Software

RFgen Software, a division of the DataMAX Software Group, is a worldwide leader in providing mobile, wireless, and voice integrated solutions with real-time and on-demand connectivity into the enterprise. The RFgen Mobile Framework is designed to easily integrate with Oracle E-Business Suite applications to extend real-time workflows to Vocollect voice-based devices, and provides true mobile (casually connected) Oracle E-Business Suite-aware operations for roaming devices. With more than 2,800 installations worldwide, RFgen-powered solutions have a proven track record for providing the flexibility and scalability necessary to grow with your business and adapt to your changing business requirements. About Oracle Validated Integration

Oracle Validated Integration, available through the Oracle PartnerNetwork (OPN), gives customers confidence that the integration of complementary partner software products with Oracle Applications and specific Oracle Fusion Middleware solutions have been validated, and the products work together as designed. This can help customers reduce risk, improve system implementation cycles, and provide for smoother upgrades and simpler maintenance. Oracle Validated Integration applies a rigorous technical process to review partner integrations. Partners who have successfully completed the program are authorized to use the "Oracle Validated Integration" logo. For more information, please visit Oracle.com at <http://www.oracle.com/us/partnerships/solutions/index.html>.

About Oracle PartnerNetwork

Oracle PartnerNetwork (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through competency development, business results, expertise and proven success. To find out more, visit <http://www.oracle.com/partners>.
