

PRESS RELEASE **FOR IMMEDIATE RELEASE**

RFgen Software's Data Connector Achieves Certified Integration with SAP Business One®

Delivers Mobile Data Collection to Customers Through Interoperability With SAP Business One

EL DORADO HILLS, CA (May 28, 2015) – [RFgen Software](#) a division of DataMAX Software Group Inc., today announced its RFgen Data Connector 5 has achieved certified integration with the SAP Business One® application. The solution has been proven to integrate with SAP Business One, providing real-time mobile data collection and barcoding for inventory management, field service and supply chain operations.

The SAP® Integration and Certification Center has certified that RFgen Data Connector 5 integrates with SAP Business One to exchange critical supply chain data collected using mobile devices such as smartphones, tablets and barcode readers.

“The connector delivers robust integration with SAP Business One without requiring a footprint on the servers running your SAP software. RFgen’s architecture has been designed to support the rapid customization of business processes while delivering ideal developer productivity tools,” said Robert Brice, president, RFgen Software.

As a result of the certified integration, RFgen Software’s out of the box mobile applications for inventory management, such as picking, receiving, cycle count, packing and shipping, now support real-time updates to SAP Business One. In addition, customers and partners can use the RFgen Mobile Development Studio to modify and design their own mobile applications. This allows customers to eliminate paper-based workflows, process orders faster and better manage their inventory.

About RFgen Software

RFgen Software, a division of the DataMAX Software Group, is a worldwide leader in providing mobile, wireless, and voice integrated solutions with real-time and on-demand connectivity into the enterprise. The RFgen Mobile Framework is designed to easily integrate with the SAP Business One application to extend real-time workflows to mobile devices.
