Description of Workflow

First the user scans, enters, or searches for a plant if one does not default from the user profile.

The user enters the LP identifier.

The LP description and location display.

If the Details box is checked, then the list will display the history of changes made to the LP.

If the Details box is not checked, then the history of changes is based on the headerlevel information such as the locations where the LP was used or created.

The arrow in the upper left corner, when clicked on, will take the user back to the menu.

Technical Information

The following describes the tables used for validation, search lists, or functions for a given prompt in this application. If applicable, the default property is also included.

Prompt	Validation / Search – Tables / Functions	Default Property / in-code defaults
Plant	F41001, F0006, LP002, LP005	RFgen user profile
LP Detail	F55101, F55102	NA
