Costpoint: Production - Manufacturing Order Reliefs Workflow

FPROR0300 Production – Manufacturing Order Reliefs

This application places manufactured parts back into inventory.

Description of Workflow

First the user scans, enters, or searches a Manufacturing Order (MO).

The part being created, the part revision, quantity being built, quantity remaining to be built, and the abbreviation the part belongs to displays.

The user scans, enters, or searches for the warehouse value if one does not default with the user's default warehouse property. It can be changed if required.

The user scans, enters, or searches a stock location.

If the part is lot-controlled, the user will scan or enter a lot number.

The user enters the quantity of the part they wish to relieve back into inventory.

If the part is serial-controlled, the user scans, enters, or searches a serial number. A counter to the right of the serial field accumulates how many serials are entered. The prompt stays in the Serial field until the same number of entries match the quantity to relieve.

Finally, the user taps the **Submit** button to relieve the inventory, and the application resets back to the MO field.

The arrow in the upper left corner will take the user back to the menu.

Technical Information

The following describes the tables used for validation, search lists, or functions for a given prompt in this application. If applicable, the default property is also included.

Prompt	Validation / Search – Tables / Web Method	Default Property
Order	MO_HDR / PART / ITEM	
Whse	WHSE	User Property "WarehouseId"
Locn	WHSE_LOC	
Lot	INVT_WHS_LOC_SR_LT	
Qty	NA	
Serial	INVT_WHS_LOC_SR_LT	
App Update	PCMRELMO web service	
Order	MO_HDR / PART / ITEM	
Whse	WHSE
