

# SAP

## SALES ORDER – SHIP CONFIRM

---

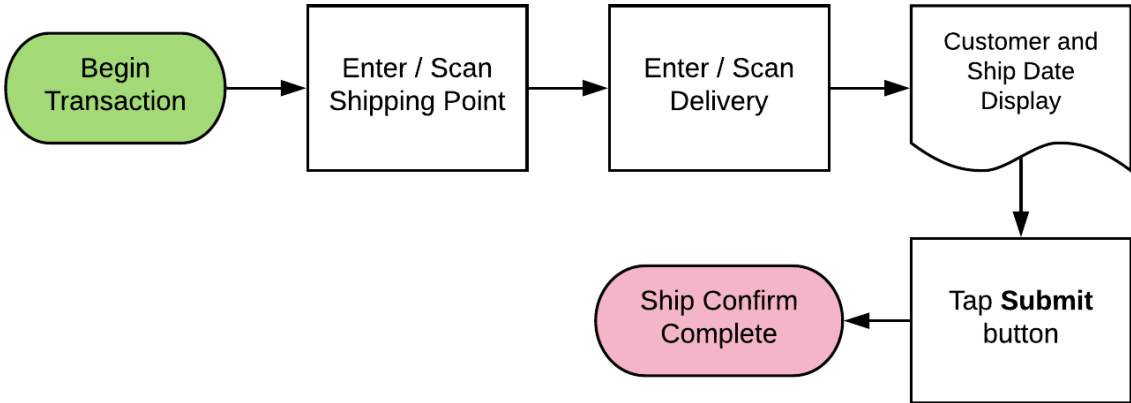

This application performs a Post Goods Issue (PGI) of the selected delivery for a Sales Order.

RFgen Functional Documentation  
2019

RFgen provides its customers SAP-validated, ready-to-use suites of “Open Source” applications and a development environment that can be used to create new apps or to modify existing apps.

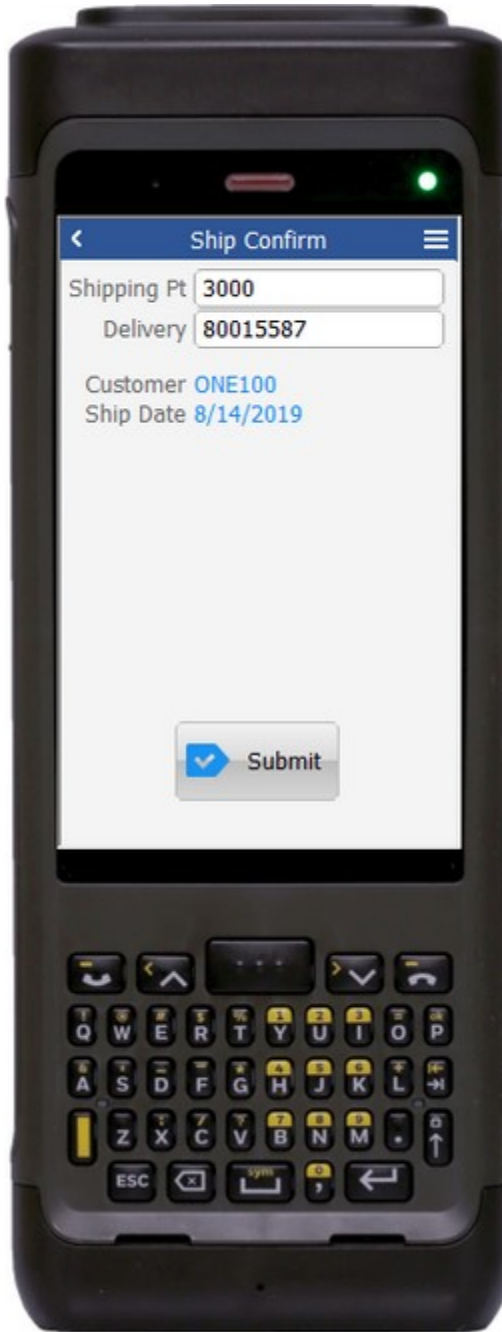

This document describes the business workflow and technical information used in this application

# SAP: SO – Ship Confirm

## FSOSC0200 SO – Ship Confirm

This application performs a Post Goods Issue (PGI) of the selected delivery.

### Description of Workflow

First user will scan, enter, or search for a shipping point if one does not default automatically.

The user then scans, enters, or searches for a fully picked delivery.

The customer and the ship date are displayed.

The user clicks the **Submit** button which performs the PGI and resets the form.

The arrow in the upper left corner will take the user back to the menu.

## Technical Information

This lists the tables used for validations, searches and defaults by prompt.

<b>Prompt</b>	<b>Table</b>	<b>Description</b>
Shipping Pt	TVST	User Property "SHIPPING_POINT"
Delivery	LIKPUK	NA
App Update	SD_DELIVERY_UPDATE_PICKING_1	NA
