SAP
FIXED ASSET –
ISSUE TO ASSET NUMBER

This application will issue material to an asset number.
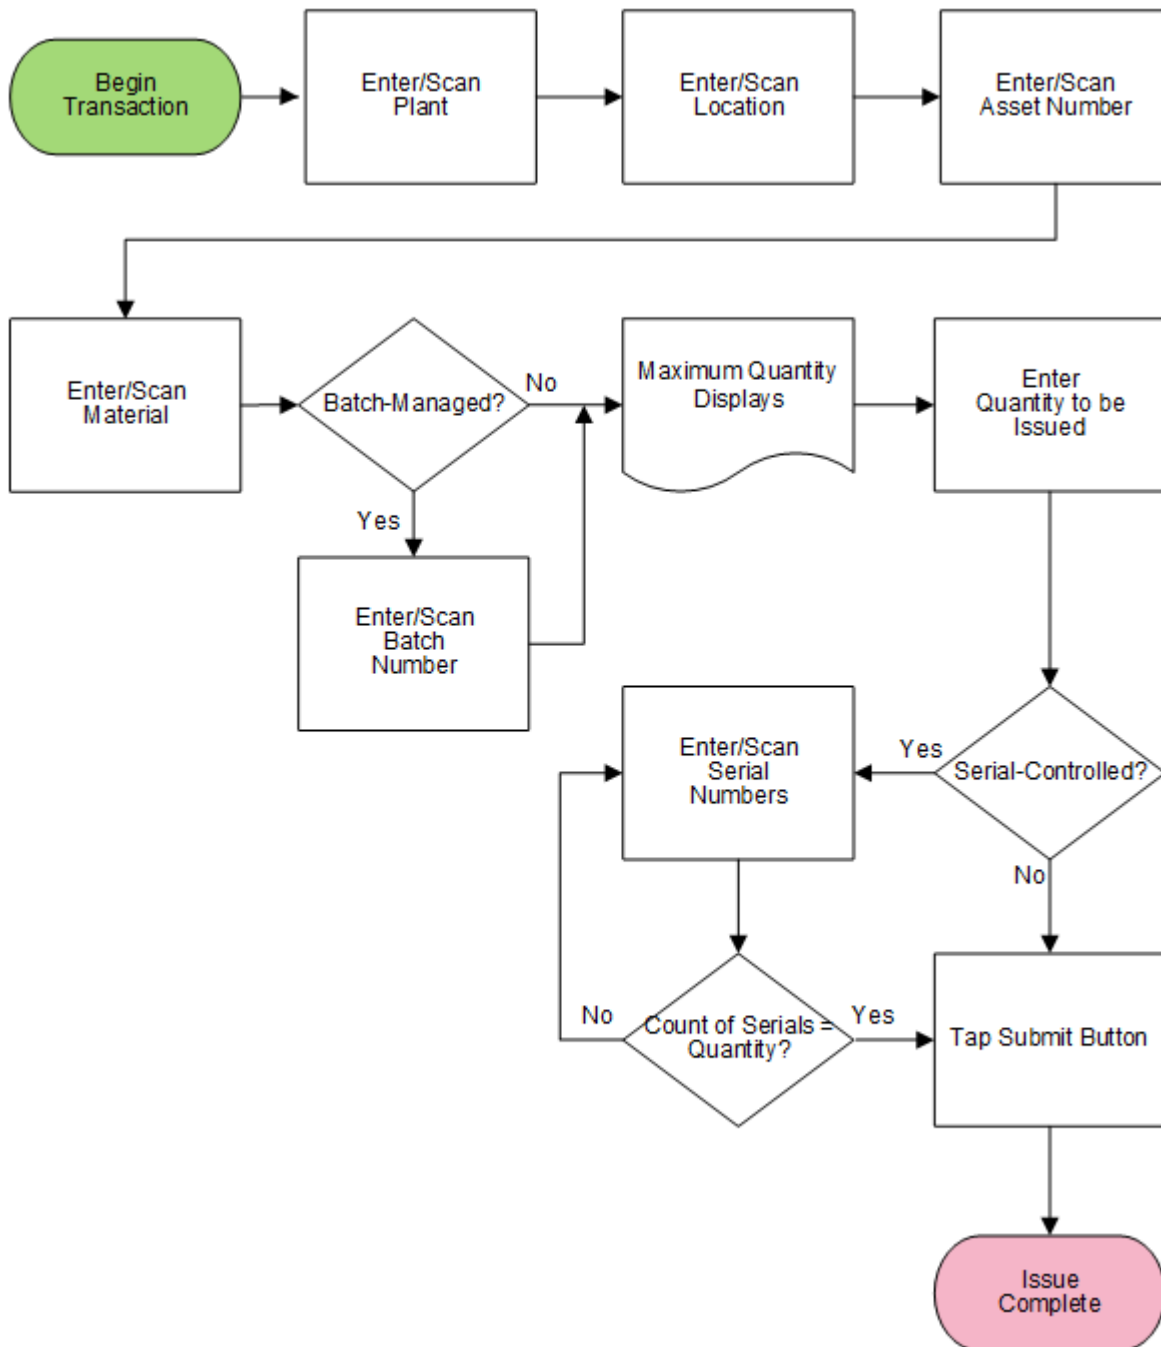

RFgen Functional Documentation

2021

RFgen provides its customers SAP-validated, ready-to-use suites of Open Source applications that can be used to create new apps or to modify existing apps.

This document describes the business workflow and technical information used in this application.

SAP: Fixed Asset (FA) - Issue to Asset Number

FFAII0200 FA – Issue to Asset Number

This application is used to issue materials to an asset.

Description of Workflow

First the user scans, enters, or searches for a plant value if one is not defaulted from the user's profile.

The user scans, enters, or searches for a location. The location must exist in the plant specified.

The user scans or enters an asset number.

The user scans or enters a material number which must exist in the location specified. The material description displays.

If the material is batch-controlled, the Batch field displays.

The user scans, enters, or searches for a batch number. The maximum quantity that can be issued for the batch displays.

If the material was not batch-controlled, then the maximum quantity is based on the material and location.

The user enters the quantity to be issued.

If the material is serial-controlled, the Serial field displays. The user scans or selects and enters serials from a list of serial numbers until the count of serials equals the quantity to be issued. Then the field will exit, and the application will display the Submit button.

The user taps the **Submit** button, and it posts the issue to SAP and resets the application.

The arrow in the upper left corner removes the current entry and moves the cursor back to the previous prompt until the user reaches the menu.

Technical Information

This lists the tables used for validations, searches, and defaults by prompt.

Prompt	Table	Description
