SAP Inventory Management (IM) – Material Inquiry by Location

FIMQL0200 IM – Material Inquiry by Location

This application helps you view materials and their quantities when the location is entered.

Description of Workflow

First the user scans, enters, or searches for a plant value if the plant is not defaulted by the user's profile.

Then the user scans, enters, or searches for a location.

After the validation, a list of materials and on-hand quantities for that plant and location display.

The arrow in the upper left corner undoes the current entry and moves the cursor back to the previous prompt until the user reaches the menu.

Technical Information

This lists the tables used for validations, searches and defaults by prompt.

Prompt	Table	Description
Plant	T001W	Plant Master
Locn	T001L	Location Master
Lookup	MARD	Material Details
