

SAP

INVENTORY MANAGEMENT – MATERIAL NUMBER CONVERSION

This application is an inquiry of the material master to determine if a material number is labelled as “Old Material” or “New Material,” or if the number is non-existent.

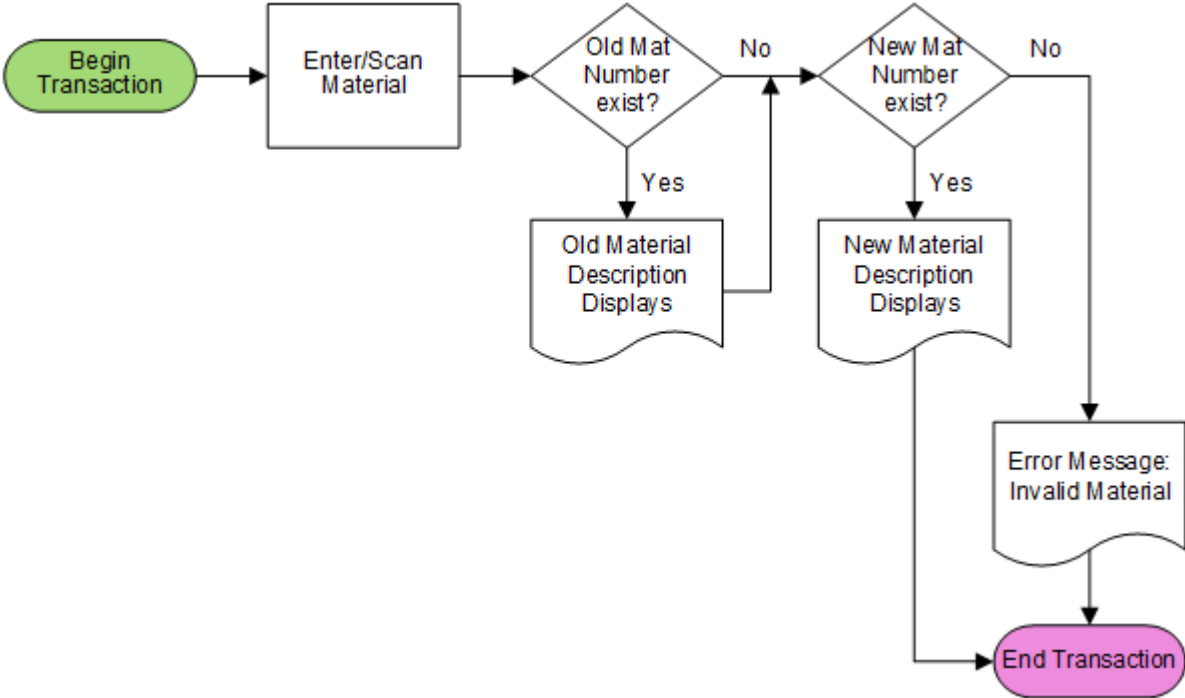

RFgen Functional Documentation

2021

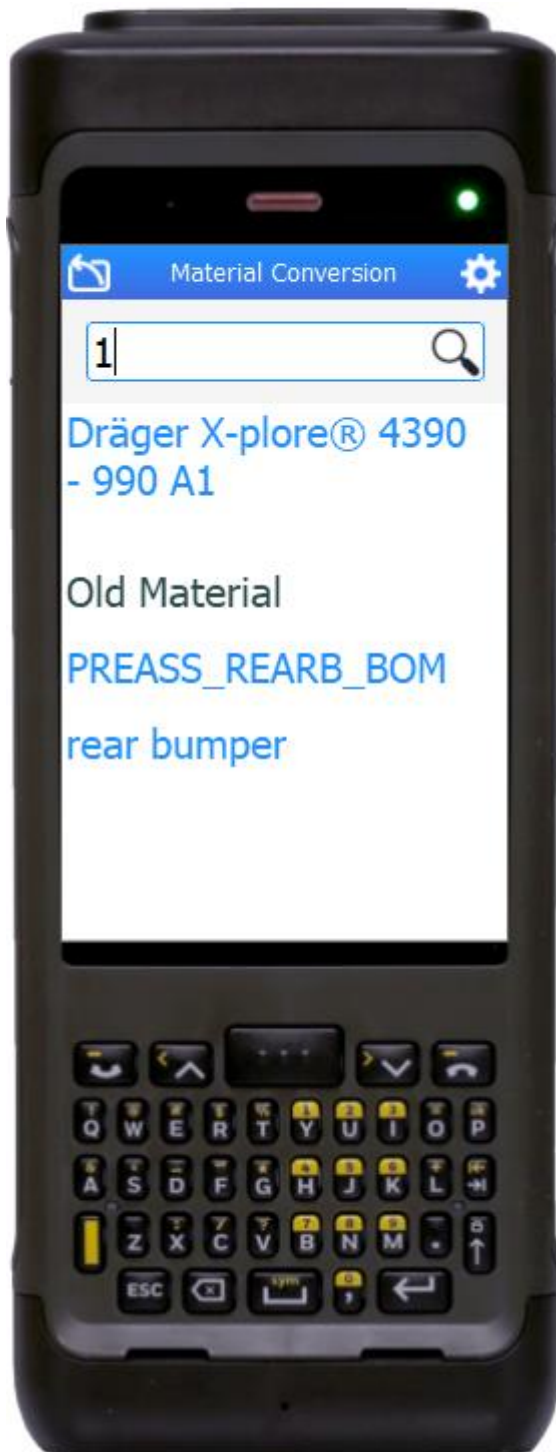

RFgen provides its customers SAP-validated, ready-to-use suites of Open Source applications and a development environment that can be used to create new apps or to modify existing apps.

This document describes the business workflow and technical information used in this application

SAP: IM – Material Number Conversion

FIMMQ0200 – Material Number Conversion

This application is an inquiry of the material master to see whether the material number is categorized under "Old Material," "New Material," or if the number non-existent in SAP.

Description of Workflow

The user enters, scans, or searches for a material number.

If the material number exists under "Old Material" the label "Old Material" and the description for it will display.

If the material number exists under "New Material" the label "New Material" and the description for it will display.

If the material number does not exist, an error message will display.

The arrow in the upper left corner undoes the current entry and moves the cursor back to the previous prompt until you reach the menu.

Technical Information

This lists the tables used for validations, searches and defaults by prompt.

Prompt	Table	Description
Old Material	BAPI_MATERIAL_GET_DETAIL / MARA	User Property "PLANT"
New Material	BAPI_MATERIAL_GET_DETAIL	Material Details
