## SALES ORDER – UPDATE SHIPMENT STATUS

---

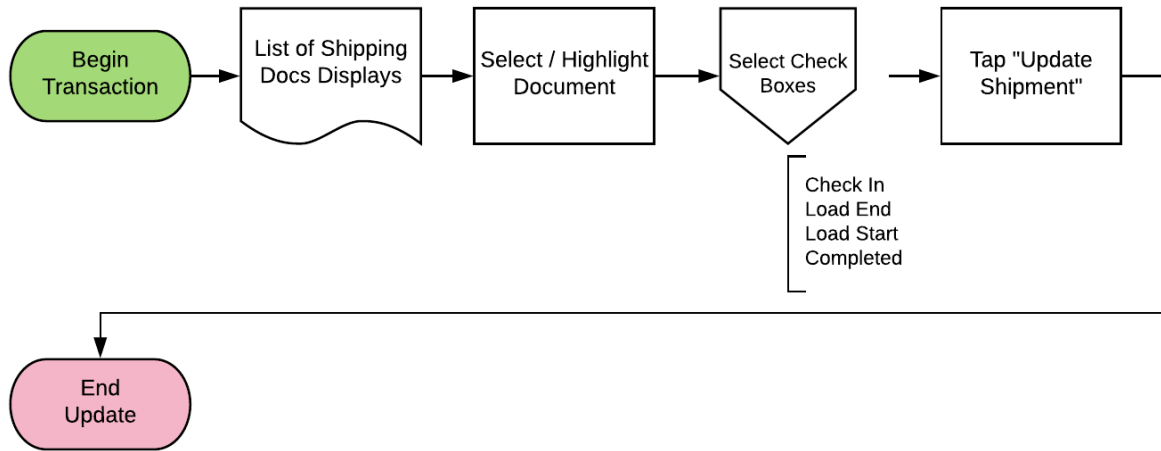

This application displays a panel list of shipments and associated statuses, so the user may see or modify the statuses.

2021

RFgen provides its customers SAP-validated, ready-to-use suites of Open Source applications that can be used to create new apps or to modify existing apps.

This document describes the business workflow and technical information used in this application.

## SAP: Sales Order (SO) – Update Shipment Status

## FSOUS0200 – Update Shipment Status

This application displays a panel list of shipments and associated statuses, so the user may see or modify the statuses.

### Description of Workflow

First user will see a list of shipment documents. As the user clicks through the list the check boxes below will reflect which statuses have been set.

The user can check or uncheck any of the statuses and tap the **Submit** button to reset the shipment to the new status values.

The arrow in the upper left corner will take the user back to the menu.

## Technical Information

This lists the tables used for validations, searches and defaults by prompt if applicable.

<b>Prompt</b>	<b>Table</b>	<b>Description</b>
IstShip	VTTK	Shipment Header Details
App Update	BAPI_SHIPMENT_CHANGE	Status Update
