

SAP

WAREHOUSE MANAGEMENT – MATERIAL INQUIRY BY BIN

This application is an inquiry based on a bin that shows material details.

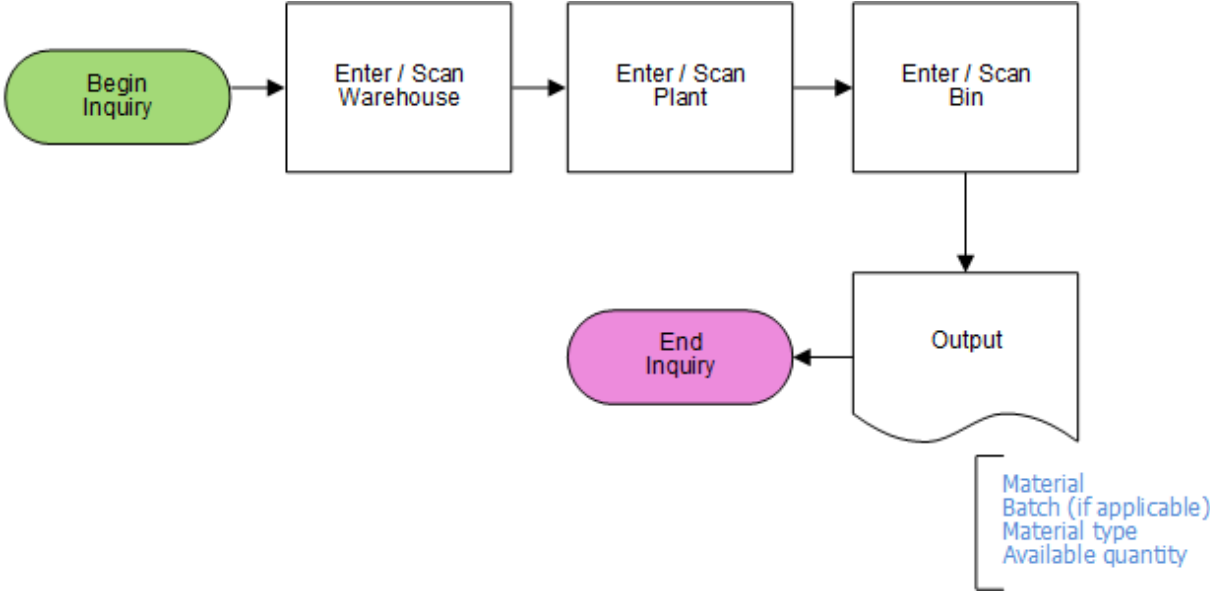

RFgen Functional Documentation

2021

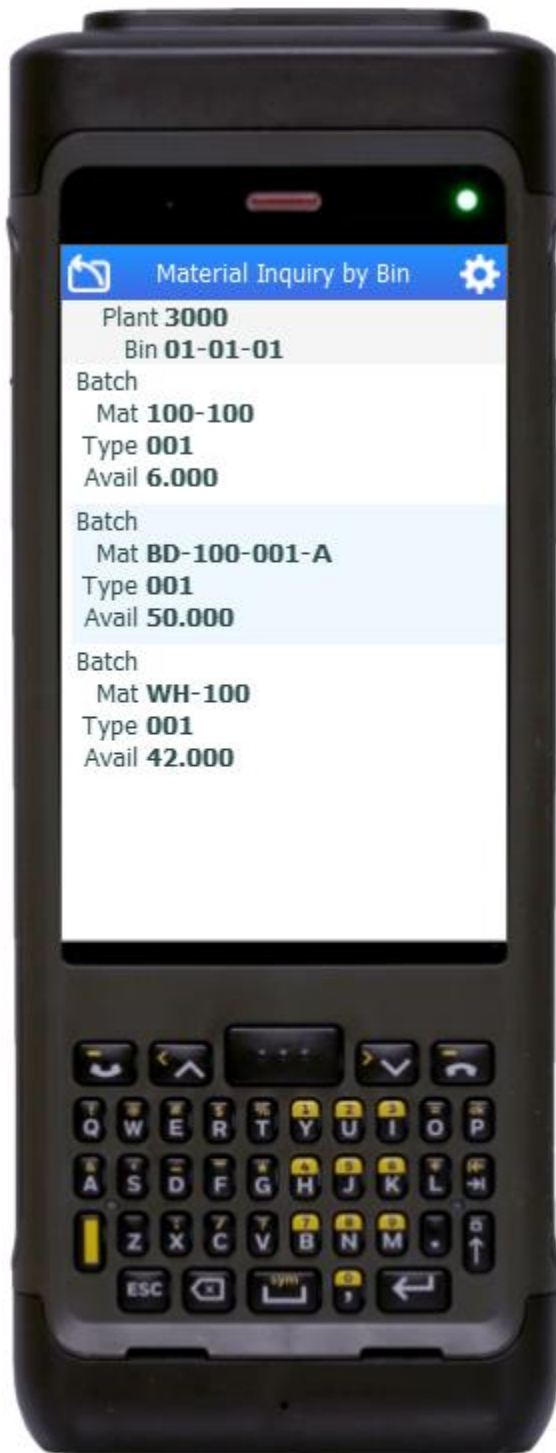

RFgen provides its customers SAP-validated, ready-to-use suites of Open Source applications and a development environment that can be used to create new apps or to modify existing apps.

This document describes the business workflow and technical information used in this application.

SAP: Warehouse Management (WM) – Material Inquiry by Bin

FWHQM0200 WH – Material Inquiry by Bin

This application displays material details for a specific bin.

Description of Workflow

First the user will scan, enter, or search for a warehouse value.

The user scans, enters, or searches for a plant value if one does not default from the user profile.

The user scans, enters, or searches for a bin.

The material's part number, batch (if applicable), material type, and available quantity display.

The arrow in the upper left corner removes the current entry and moves the cursor back to the previous prompt until you reach the menu.

Technical Information

This lists the tables used for validations, searches and defaults by prompt.

Prompt	Table	Description
WH	T300T	Warehouse Master
Plant	T001W	Plant Master
Bin	LAGP	Bin Details
App Lookup	LQUA	Warehouse Material details
